

TRITON®

SPRING

2021 PROGRAMS

## **WE ARE TRITON, THE INVENTOR OF THE SCIENCE OF DESIGNING CONTEMPORARY METAL JEWELRY.**

Each piece a perfect infinite circle wrapped in innovative design, durability, and stylish materials perfect for the confident man. Made strong enough to withstand the trials of everyday life. Empowered to fuse the ties that bind us.

Triton jewelry accompanies you everywhere you go. Job. Gym. Any place the open road takes you. Each complex metal piece as bold and fearless as the man himself.

# MIXED MATERIALS

New sustainable Wood, Forged Carbon, & 14K Gold core designs.

## MORE METALS. MORE MATERIALS. MORE PERFECT MIXES FOR YOUR CUSTOMERS.

Triton expands its Mixed Material offerings which offers the consumer the creative freedom to mix and match metals, materials, colors, patterns and textures all in one ring design. Our new sustainable Wood, Forged Carbon and 14K Gold core designs are all backed with Triton's proprietary TC.850™ Tungsten Carbide material to deliver strength, weight, and durability. Unique, stylish, and never typical—Triton's new designs are as bold and strong as the man who wears it.

## PRODUCT DETAILS

### FORGED CARBON

We take carbon fiber, shred it, then compress it under heat to create a striking marbled pattern that's subtly different with every single pressing. That ensures a slightly unique pattern in each piece, meaning no two rings are exactly alike.

#### DESIGN OPTIONS INCLUDE:

- 2 designs within the collection are combined with Titanium
- 2 designs are combined with Wood
- 1 design offers Forged Carbon flat center design

### 14K GOLD DESIGNS

- 8 new designs available in White, Yellow, or Rose Gold
- Geometric shapes that feature cubed, 3D wave, and prism patterns
- Each new design features strong textural and dimensional aesthetic

## NATURAL WOOD

- 3 new natural & sustainable wood materials: Walnut, Maple, & Cherry—all sourced from farms protected by the US Forest Stewardship Council
- Since natural materials can vary by having different color hues, tints, shades, tones, grains and textures, each ring is entirely unique
- All designs are pre-treated, vacuum sealed to protect the ring from moisture and then a final e-coating is applied to the finish for further protection and extra luster

### WALNUT

**TEXTURE:** Even, slightly coarse  
**GRAIN PATTERN:** Generally straight, can be wavy  
**COLOR:** Dark brown with lighter streaks  
**CORE DESIGN PROFILE:** Flat

### MAPLE

**TEXTURE:** Fine and even  
**GRAIN PATTERN:** Typically straight  
**COLOR:** Pale brown, beige-cream  
**CORE DESIGN PROFILE:** Flat

### CHERRY

**TEXTURE:** Fine, close, even  
**GRAIN PATTERN:** Straight  
**COLOR:** Medium red-brown  
**CORE DESIGN PROFILE:** Dome

# ESPRESSO

Rings rich in color and strength.

## A SOPHISTICATED HUE FUSED WITH OUR REBELLIOUS SPIRIT

Triton is proud to introduce a luxurious Espresso coating on our patented Tungsten Carbide TC.850 bands. This stunning brown color is vivid—a fashion statement that’s as versatile as it is stylish.

### PRODUCT DETAILS

**HAMMERED:** Rugged and undeniably masculine, our hammered bands in Espresso are truly striking. The classic texture is available in our iconic Espresso and multiple colorways, including a pop of black for an edgy fashion-forward twist. *7mm and 8mm*

**DOME:** This is a contemporary take on the Dome shape that exudes sophistication. Combined with the bold color blocking of gunmetal gray, Espresso Dome bands stand out from classic bands. *Only in 8mm*

**CENTER LINE:** Adding depth and dimension, our Center Line styles add bold visual definition to each band. The intricate layering of varying metal width channels and colors radiate with style and charm. *Only in 8mm*

**DIAMOND:** Two unique diamond styles stand out in this collection, including a black sapphire eternity band and a vertical channel white diamond design. Both add a dynamic contrast to the rich Espresso color. *Only in 8mm*

# FORGED CARBON

Industrial looks that are truly one of a kind.

## BECAUSE STRENGTH AND STYLE GO PERFECTLY TOGETHER.

Forged Carbon—a series of rings crafted from carbon fiber and resin—two materials that when brought together redefine strength and style more than either on its own. It's a union that results in an indisputably distinctive collection. Each ring is crafted with the utmost quality and care. And the unique patterns and textures offer rugged, yet refined styling. Paired with an assortment of other metals, Forged Carbon sets a new standard—and delivers.

## PRODUCT DETAILS

### FORGED CARBON WITH 14K GOLD

Treasured for its natural beauty and radiance, 14K Gold has been the staple of luxury jewelry for centuries. Its rich luster creates a bold contrast against the marbling effect of the Forged Carbon.

### FORGED CARBON WITH TITANIUM

First used during and after WWII in military and aerospace applications, Grade 5 Titanium is used to create rings that are extremely lightweight, hypoallergenic, supremely strong—and will not tarnish.

### FORGED CARBON WITH DAMASCUS

Originally developed for sword making thousands of years ago, damascus is created by forging together 2 metals with extreme heat—then submerging it in acid. The result is a stronger, more durable steel with notably singular markings.

# TRITONRAW BLACK DLC

Smooth yet edgy. Bold yet understated.

**BLACK DLC (DIAMOND LIKE COATING)**  
FOR COLOR, LUSTER, AND DURABILITY

## THE POWER OF BLACK—THE NEXT EVOLUTION OF TRITONRAW

This is TritonRAW Black DLC, our signature Tungsten Carbide in its elemental state, now available in the color and finish that personify style. Delivering on its name, this new series showcases dramatic black designs—available in solid black, bold color combinations with ceramic interiors. TritonRAW Black DLC exemplifies modern aesthetics because black is the color that never goes out of style.

### PRODUCT DETAILS

#### BLACK TUNGSTEN RAW

Four classic silhouettes redefined in black raw DLC material.

#### BLACK TUNGSTEN RAW WITH CERAMIC

These mixed-material rings combine ceramic with TC.850. The ceramic blue interior color provides a contrast against the dramatic darkness.

#### BLACK TUNGSTEN WITH 14K GOLD

Two ring profiles featuring precious Gold paired with DLC.

#### BLACK DLC WITH BLACK SAPPHIRES

Stunning black sapphires look bold against the black DLC material.

#### PATENTED AND PROPRIETARY MULTILAYERED COATING PROCESS

- Exclusive multilayer coating process with black DLC layer protects the finish
- Scratch-resistant with high luster
- Friction fit into the outer metal ring with pressure and super high-tech adhesive in inner channel
- Wear-tested ceramic styles for durability and reliability
- True ceramic material—not a coating. Ceramic color is solid, not a painted lacquer

### PACKAGE OVERVIEW

# METEORITE

Unique patterns that are out of this world.

## THE ELEMENTAL NATURE OF SPACE & TIME ARE REVEALED IN OUR UNIQUE DESIGNS.

A rare and unique material, people have been using meteorites to craft rings and other jewelry for thousands of years. The natural patterns, the result of nickel-iron crystals growing as the heated meteorite very slowly cools over millions of years, make each piece special. When polished, the resulting crystalline pattern that shows on the surface of the meteorite is very distinct, and an indication that the material is of extra-terrestrial origin.

### PRODUCT DETAILS

#### MUONIONALUSTA METEORITE

Triton uses Muonionalusta Meteorite, which is estimated to be over 4 billion years old. This meteorite is only found in Sweden and is excavated by government-regulated meteorite hunters. Our meteorite has been acid etched to reveal striking crystal-like patterns found throughout.

#### DESIGN OPTIONS INCLUDE:

- Flat with Beveled Edge
- Low-dome with Flat Edge
- Dome with TC.850 Round Edge

**All of Triton's Meteorite rings are backed with our proprietary TC.850 material.**
